EXPERIENCE

Mandala Clothing, Brazil — *Software Engineer*

MARCH 2020 - MARCH 2022

I developed open-source projects and systems for external clients, such as a UI component library and an e-commerce. I also had the opportunity to become a partner due to my performance and importance in the company.

Mandala Clothing, Brazil – *Intern developer*

OCTOBER 2019 - MARCH 2020

I was responsible for developing and maintaining internal systems in Angular and NodeJS. I also developed payment features and micro-services.

DVJNet, Brazil— *Intern developer*

JULY 2019 - OCTOBER 2019

In this company I had my first opportunity as a professional programmer. I developed systems in C# and ASP.Net for petshop automation and management. I also developed integrations with e-commerce and invoice functionalities.

EDUCATION

University of the People, California- Bachelor’s in computer science

JUNE 2020 - JUNE 2024

University of the People is a 100% online US university. In this course I am learning the mathematics behind computing, testing and creating quality systems and developing academic research.

Escola técnica estadual (ETEC), São Paulo – *Técnico em informática*

JANUARY 2018 - JULY 2019

Course where I learned to analyze and design systems using PHP, Javascript, C# and Java languages. I also learned to model, implement, and maintain databases using Mysql and SQL Server.
